Amendment to Controlled Substances List

Section I AUTHORITY

Ark. Code Ann. §5-64-201, gives the authority to the Director of the Arkansas Department of Health, to place substances in schedules pursuant to the procedures of the Administrative Procedures Act, as amended. In making a determination regarding a substance, the director shall consider the following:

The actual or relative potential for abuse

- The scientific evidence of its pharmacological effect 2.
- The current scientific knowledge regarding the substance

The history and current pattern of abuse

The scope, duration and significance of abuse

The risk to public health

The potential of the substances to produce psychic or physiological dependence liability and

Whether the substance is an immediate precursor of a substance which is already controlled

Ark. Code Ann. §5-64-211 lists the criteria for placing a substance in Schedule V as follows:

- The substance has low potential for abuse relative to the controlled substances listed in Schedule IV.
- The substance has currently accepted medical use in treatment in the United States and ---
- 3. The substance has limited physical dependence or psychological dependence liability relative to the controlled substances listed in Schedule IV.

Section II **PURPOSE**

To amend the Controlled Substances List filed August 16th, 1995. This amendment adds two chemical names inadvertently omitted from the list filed with the Secretary of States Office, and deletes the isomer pseudoephedrine from the definition.

This proposal has been urged by concerned citizens, Law Enforcement, the Pharmacy Board and Medical Board, to join a national move to take over-the-counter Ephedrine products off the shelves and put them under the control of licensed pharmacies.

Reports of abuse, and even deaths from overdoses, have come from over fourteen. states causing these states to restrict the sale of Ephedrine, for medical purposes, through licensed pharmacies, and other means.

Section III GENERAL REQUIREMENTS

State of Arkansas Controlled Substances List (August 30, 1994)

Replace Page 13 (d) (2):

(2) Ephedrine:a -{-(Methylamino)ethyl}benzene-methanol; a-{-(methylamino) ethyl}benzyl alcohol; 2-methylamino-l-phenyl-l-propanol; l-phenyl-l-hydroxy-2-methylaminopropane; l-phenyl-2-methylaminopropanol; a - hydroxy-β-methylaminopropylbenzene; a product which occurs in the Chinese herb Ma Huang (Ephedra vulgaris, Ephedra sinica Stapf., Ephedra equisetina Bunge, Gnetaceae) and in several other Ephedra spp. All products containing Ephedra, Ephedrine, its salts, its optical isomers and salts of optical isomers and therapeutically insignificant quantities of another active, medicinal ingredient or ingredients.

Section IV REPEAL

A list of schedules of controlled substances in conflict herewith, including but not limited to, those adopted August 16, 1995, are hereby repealed.

ARKANSAS

STATE OF ARKANSAS CONTROLLED SUBSTANCES LIST OCTOBER 30, 1995

Pursuant to the provisions of Section I through 23, Act 898 of 1979 and under the authority of Section I, Act 590 of 1971 of the laws of the State of Arkansas, the Director of the Arkansas Department of Health or duly authorized agent, as specified by law, is giving public notice of the publication of the List of Controlled Substances for the State of Arkansas.

Due consideration has been given applicable federal regulations, current scientific knowledge regarding the listed substances, the evidence of actual or relative potential for abuse, the history and current patterns of abuse, the risk to the public health, and potential to produce psychic or psychological dependence liability.

Based on these considerations the attached listing of the Schedule of Controlled Substances and the corresponding drugs which are included in each schedule is hereby promulgated by the Director of the Arkansas Department of Health as the Controlled Substance List of the State of Arkansas.

Each controlled substance or basic class thereof, has been assigned an "Administration Controlled Substance Code Number" for purposes of identification. These numbers are for internal management and are used as a means to identify substances with complex and cumbersome chemical names.

Next to the code number is the date the substance was placed in schedule by the Director of the Arkansas Department of Health.

I, Donna Neill, P.D., Director of Pharmacy Services and Drug Control for the Arkansas Department of Health, do hereby certify that the documents attached hereto are true and correct copies of the current list of controlled substances adopted by the Arkansas Department of Health in accordance with Arkansas state law.
