

## NOTICE OF EMERGENCY RULE-MAKING

The Arkansas Department of Labor has issued an emergency regulation amending Regulation 5.4 of the Administrative Regulations of the Arkansas Amusement Ride and Amusement Attraction Safety Insurance Act. Adoption of this rule will allow the agency to inspect mechanical bulls, gyro devices, and trackless trains on a six month basis instead of each time the amusement ride/attraction is set up. This rule is being adopted as an emergency regulation to immediately begin the six month inspection schedule on the effective date of Act 540 of 2013. The emergency regulation will be effective August 16, 2013, and will remain in effect for 120 days. The agency anticipates that it will be replaced by a permanent regulation addressing the same issues. A copy of the emergency regulation may be obtained from the Arkansas Department of Labor by calling (501) 682-4504, or by accessing it on the agency's website at: <http://www.labor.ar.gov/news/Pages/proposedRuleMaking.aspx>.

Ricky Belk, Director  
Arkansas Department of Labor
