OFFICIAL NOTICE

DMS-2005-W-1

TO: Health Care Provider – All Providers

DATE:

SUBJECT: 2004 HCPCS Final Procedure Code Conversion

I. General Information

A final review of the HCPCS procedure codes has been completed and the Arkansas Medicaid Program will begin accepting updated HCPCS procedure codes on claims with dates of service on and after July 1, 2005.

II. 2004 HCPCS Payable Procedure Code Tables Information

Payable procedure codes have been broken into separate tables. Tables have been created for each payable provider type (e.g.: physician, hospital, etc.)

The tables are designed with nine columns of information. All columns may not be applicable for each covered program, but have been devised for ease of reference.

The first column contains the HCPCS procedure code. In some instances, the procedure code will be shown in multiples, depending on the number of types of service for which it can be used by a provider.

The second column is the procedure code description.

The third column is the type of service (TOS) code that may be used in conjunction with the procedure code. Type of service codes are used when billing on paper.

The fourth and fifth columns indicate any modifiers that need to be used in conjunction with the procedure code, when billing, either electronically or on paper. The columns are titled “M1” and “M2”. This information is used in the prosthetics program.

The sixth column indicates the diagnosis list, and is titled “Diag. List”. The information is used by physicians, hospitals, independent radiology, ambulatory surgical centers, area health education centers and nurse practitioners. Applicable lists will be discussed in each provider’s section.

The seventh column indicates whether a review must be completed when providing a service. The column is titled “Review Y/N”. A “Y” in a column means that a review is necessary; an “N” indicates that a review is not necessary. Providers should consult their program manual to obtain the information that is needed for a review.

The eighth column shows procedure codes that require prior authorization (PA) before payment. The column is titled PA, Y/N”. An alpha “Y” in the column indicates that a procedure code requires prior authorization and an “N” means that the code does not require prior authorization. Providers should consult their program manual to ascertain what information should be provided for the prior authorization process.

The ninth column shows procedure codes that require manual pricing and is titled “MP Y/N”. An alpha “Y” in the column indicates that an item is manually priced and an “N” shows that an item is not manually priced. Providers should consult their program manual to review the process involved in manual pricing.

III. Diagnosis Lists

The following are the diagnosis lists referred to in column six which are used by physicians, hospitals, independent radiology, ambulatory surgical centers, area health education centers and nurse practitioners. The diagnosis list refers to specific ICD-9 codes and certain procedure codes are limited by the diagnosis lists. Not all providers use all the lists, but they are shown for clarity of information.
