

SUMMARY FOR
Prosthetics Update #67

Arkansas Medicaid has changed two modifiers, 22 and 52, which are used in conjunction with several procedure codes in the Prosthetics Program, to UA and UB respectively. Also, several previously promulgated HCPCS national procedure codes are being added. Some national codes are being deleted along with all local codes that were cross-walked to national codes. These changes have been made for compliance with the national Healthcare Common Procedure Coding System (HCPCS) standards.
