RULE B-14: SURFACE EQUIPMENT

Meter settings of adequate size to measure the gas efficiently for the purpose of obtaining gas-oil ratios shall be installed on the gas vent line of every separator, or a connection placed on end of flare line to permit measuring gas by means of orifice well tester. Wellhead equipment shall be installed and maintained in first class condition so that static bottom hole pressures may be obtained at any time by duly authorized agents of the Commission. Valves shall be installed so that pressures can be readily obtained on both casing and tubing.
