

SUMMARY STATEMENT
MINIMUM TREATMENT EXCLUSION-ARKANSAS PEST CONTROL
REGULATIONS

The proposed rule change will change the methods by which Pest Control Operators may exclude a property from meeting certain of the established minimum treatment standards. The rule will establish the protocols for which operators may apply for an exemption, set the maximum number of approved exclusions available to an individual operator, establish a fee schedule for the application, delineate the enforcement actions that will be taken if a violation is found and establish a time frame for Plant Board processing and response to the application.
